# A Vishal Chandnani Application

Rangoli on heroku

NOTICE
No developers were harmed while deploying this application.

Rangoli

Rangoli is a beautiful elephant from the culture-rich and spectacular state of Rajasthan, India.

During the day, Rangoli transports visitors to the top of the Amer Fort in Amer, Rajasthan. In the evenings, she pair programs with vchandnani and writes AngularJS applications.

- Q&A

Heroku

Heroku is a cloud platform that lets companies build, deliver, monitor and scale applications — the fastest way to go from idea to URL, bypassing all those infrastructure headaches.

https://www.heroku.com

https://devcenter.heroku.com

https://devcenter.heroku.com/articles/git

Heroku Architecture

https://devcenter.heroku.com/articles/how-heroku-works

https://devcenter.heroku.com/categories/heroku-architecture

Heroku Toolbelt

Heroku Toolbelt provides command-line tools for working with the Heroku platform on Mac OS X, Windows and Debian/Ubuntu.

https://toolbelt.heroku.com

Rack Applications

Heroku supports Rack and Rack-based web frameworks like Sinatra.

To run a Rack-based app, include a Gemfile, as well as a rackup file named config.ru in the app's root directory. The config.ru file convention has become common, so most existing Rack applications should not require changes to deploy to Heroku.

require './app'

run Sinatra::Application

Heroku CLI: Login

Login using your heroku account credentials.

$ heroku login

Heroku CLI: Create Application

Create your application.

$ heroku create rangoli

Creating rangoli... done, stack is cedar-14

https://rangoli.herokuapp.com/ | https://git.heroku.com/rangoli.git

Heroku CLI: Push Application

Push your application.

$ git push heroku master

Heroku CLI: Migrate Database

Migrate application database.

$ heroku run rake db:migrate

Heroku CLI: Logout

Logout from Heroku.

$ heroku logout

Heroku UI: Rangoli

Voila! Access the deployed application.

https://rangoli.herokuapp.com

Heroku UI: Dashboard

Access your heroku dashboard.
